CAULIFLOWER

In judging Cauliflower we use the following standards as being essential: Short, strong stem; broad outer leaves; inner leaves folded well over the heart for self protection; good weight and depth of head at maturity; resistance to "riciness" and "fuzziness"; absence of small green leaves coming through the head. All these fine points are bred into the seed and that's why so many growers prefer our stocks.

Early Giant Hybrid. Robust vines and heavy yields of firm red fruits make this variety the best of the large early hybrids. Try some	\$4.50	\$8.00	\$26.00
Hystep F2. Very early and extremely prolific. Resistant to blight, and with just enough vine coverage to avoid sun burning. We recommend that you try some	.60	1.00	3.00

Burpee's 1132 Hybrid. This hybrid is especially adapted to stakes, and trellis growing. The fruits are very uniform, and the clusters "set" all the way up the vine. Very heavy yielding. This variety also does very well for greenhouse forcing	3.50	6.00	20.00
Big Boy Hybrid. A very large, thick walled, red flesh Tomato. Wonderful for roadside stands, home gardens, plant sales, and fresh market. Whenever people want real quality, plus hybrid vigor, they always choose Big Boy Hybrid	4.50	8.00	26.00
Fordhook Hybrid. This hybrid is for early use. The fruits are medium sized, uniformly shaped, and are especially adapted to short summer season areas.	3.50	6.00	20.00

'TWIST-EMS'

The modern way of tying vegetables in bunches is by using "Twist-Ems." A "twist of the wrist," or a twist of the bunch and the tie is made neatly and permanently. The wire does not break and the twist will not come loose. Does a quick job of bunching Beets, Carrots, Celery, Green Onions, Gladiolus, Sweet Peas and other products. Market gardeners, flower growers, nurserymen, and florists have plenty of uses for these smart-looking ties. Packed 250 in a bundle, colored green or red.
